

# SUN BEAMS

by WALTER M. BARRETT

As Mr. Farley so aptly remarked following the election Tuesday: "The voice of America has spoke." Perhaps the candidate you wanted to win was defeated, perhaps he won, but regardless of whether he won or lost, we are still the United States of America and should accept the verdict of the majority as conclusive and whether Republican, Democrat or New Dealer we face mutual problems which can be solved only through close cooperation and unity. Above all we must not permit personal feelings to influence our love of country. Petty hatreds which have been stirred by unnecessary mud throwing by radio speakers should be forgotten. Each candidate promised faithfully to serve all the people and each promised to keep us from becoming involved in a foreign war. Those, we believe, were the important issues. Let us then place our belief in those promises and like good citizens all work for a common cause—the preservation of the United States and our democratic way of life. Let the voice of America be heard!

The Truckee Chamber of Commerce should be and can be the most active, representative organization in town. Considerable discussion over who is to be the president has occupied lots of time since the resignation of Mr. White. In our opinion, the selection of a president is not nearly as important as the cooperation given the chamber by the membership. Without incorporation, the chamber of commerce must assume the duties of a city council beside handling the booster routine which ordinarily falls to such an organization. With this additional duty the chamber must represent every interest in town and the only way this representation can be complete is to have representatives from every pursuit active in the group. We have heard it said that our chamber of commerce is worthless, but if that is a fact then it is a fact only with those who make such claims. For those who need and appreciate the help of the organization that help is forthcoming. It is entirely the fault of those who so criticize that the chamber is not more valuable to them. It is an organization for all the interests and it will serve those interests well if we will only get together and boost instead of knocking.

The attitude of out-of-town truck drivers in not blocking the parking spaces along the main thoroughfare during the past few weeks has been brought to our attention. We are sure that the local merchants fully appreciate this change of habit and that motorists will rejoice in the fact that they are no longer forced to wait impatiently for a driver to complete his deliveries before they can move their car or locate a parking spot. We hope the practice will continue.

## LOCAL CHILDREN EXAMINED AT CLINIC HELD BY DENTIST

Ten Truckee children were examined at the pre-school dental clinic held last week at the office of Dr. W. D. Teeple when Mrs. Marion Newberry of the county health department, and Miss Marjorie Hickock, state dental hygienist, assisted Dr. Teeple in examinations.

Six of those examined were asked to return and two additional will be called for the next clinic on November 27 at the same place.

A committee comprising Mrs. Agnes Mahne and Mrs. Vivian Gregory from the Wyethia Women's Club are in charge of the arrangements.

## LOCAL BOY ARRIVES AT PANAMA WITH U.S. ARMY; BROTHER IN

Edwin Waters who recently enlisted in the Army for service in Panama has reached that southern country but at latest word has not landed because of a measles quarantine on the ship.

Waters made the ten-day trip on the transport Republic on which was reported to have been found a nitroglycerine bomb weighing two pounds, with a time fuse. The death-dealing instrument was discovered at sea, according to news reports.

In the meantime, a second Waters boy, Orlan, has made application for enlistment in the Army. His application was accepted in Grass Valley and he will be sent to San Francisco or Sacramento for final examinations. Orlan is 18 years old.

## Funeral Rites Are Held Here For S. Cupples

Well Known Retired Local Railroad Man Dies In San Jose

### LODGE RITES HELD

Deceased Served 41 Years As Employee of Local Railway

Impressive last rites were held at the Masonic Hall here Sunday afternoon for Samuel Redmond Cupples, 73, widely known former Truckee resident, who expired at his home in San Jose Thursday.

The funeral was conducted by the Truckee Masonic Lodge with Roy Feathers officiating as master. Music was provided by Mesdames George Kamp, Vernon Pearson, Harold Hart, Dan Smith, Robert Bick, Dave Cabona, L. E. Zoebel and Mary Roquette. Rev. G. J. E. Keetch was the minister. Interment was in the Masonic cemetery under the direction of the W. H. Laity Funeral Home.

Pall bearers, all close friends of the deceased, were Eric Gram, Vernon Pearson, C. E. Smith, Dr. J. H. Bernard, Joseph Gini and Mr. Mills. Born in Ireland, Cupples came to America at the age of 20. He served 41 years with the Southern Pacific, a large share of it as roadmaster in the Truckee region. He went to San Jose in 1922 and retired in 1936 after serving as roadmaster for the district between San Jose and Gilroy.

He leaves a wife, Mary, and the following children: J. H. Cupples of Detroit, who flew to his father's bedside; S. E. Cupples, Santa Clara city councilman; Dr. R. A. Cupples, San Jose dentist, and Mrs. Harold Lietz of San Francisco. He also leaves four brothers and four sisters.

An active Mason, he was affiliated with the blue lodge of Truckee, the Royal Arch in Truckee, Knights Templar in San Jose and Islam Temple in San Francisco.

## D. CABONA IN LINE FOR ROSE BOWL TRIP IN SALES CONTEST

A free airplane trip to the Rose Bowl football game, west coast classic, and \$50 in cash will be the reward for D. Cabona, Truckee Philco radio dealer, if the record which he has established among other dealers in the Reno district is maintained during this month. At the latest report Cabona was leading the field of nearly a score of radio dealers and had a nice margin for the home stretch. The new Philcos are making a hit and according to Cabona are far superior to older models.

## LOCAL GRID SQUAD TO MEET AUBURN TEAM AT TAHOE

TAHOE CITY—A team composed of students from Tahoe Branch of Placer Union High School and Meadow Lake Union High School of Truckee will play a game of six-man football at the Tahoe school grounds on Saturday against a six-man team from the Auburn branch of Placer Union.

A party at the school on Saturday night will be given by the Tahoe students in honor of the visiting teams and fans. All Truckee and Auburn students are invited to attend.

## TRAFFIC COP SPEAKS TO ROTARY CLUB ON HIGHWAY PATROL

Highway Patrolman Ellis McCann was the main speaker at Monday's meeting of the Truckee-Tahoe Rotary Club, using as his topic "The Highway Patrol." He discussed duties, laws and violations in an interesting and educational manner.

The meeting was held following a dinner at Moro's Restaurant and Tom Ryan was program chairman. President Theodore Schleuter presided.

## Victors in Tuesday's Poll

FRANKLIN D. ROOSEVELT

President Franklin D. Roosevelt became the first man in history to successfully seek a third term in office. Roosevelt was returned to the office he has held since 1933 by a substantial majority of the largest vote ever turned out in a national election. His running mate, Henry A. Wallace of Iowa, ex-Republican and former secretary of agriculture, was elected to succeed Vice President John Nance Garner of Texas. Roosevelt's Republican opponent, Wendell Willkie of Indiana, cut five million from the President's plurality of 1936 over Alf M. Landon but trailed by a safe margin.

HENRY A. WALLACE

## MRS. BOWEN NAMED WORTHY MATRON OF O.E.S. CHAPTER HERE

At the regular meeting of Truckee Chapter No. 116, O. E. S., the following officers for the ensuing year were unanimously elected.

Leona Bowen, worthy matron; D. Wesley Bowen, worthy patron; Clara Greene, associate matron; G. E. Hofmann, associate patron; Naomi Hursey, conductress; Jennie Moore, associate conductress; Jennie Watkins, secretary and Elizabeth McKay, treasurer.

The above, including appointive officers, will be installed on Tuesday, December 3rd.

## LOCAL PUBLISHER IS CHOICE TO BE HEAD OF LOCAL CHAMBER

In the recent nominations for president of the Truckee Chamber of Commerce to succeed C. B. White, who has resigned, cards mailed to members revealed that Walter M. Barrett, publisher of the Sierra Sun, had received the majority of the nomination votes. This does not mean that the decision is final and no definite result will be known until Monday.

In the meantime, members holding nomination cards are urged to mail them at once so that the election may be held Monday at the noon meeting to be held at George's Cafe.

## MRS. MacCARTHY, JR., IS HONORED ON HER NATAL DAY AT LAKE

Mrs. Thomas MacCarthy, Jr., was feted recently at a birthday dinner given by Celeste Planett at Kings Beach. Guests bidden to share the event included Mr. and Mrs. Bud English, Jack English, Mary Planett, Fred Planett, Don Douglas, Jack Reimers of San Francisco, William Remus and Thomas MacCarthy.

The honoree received many gifts on the occasion.

## LOCAL LEGION POST PLANS DANCE NEXT NEW YEAR'S EVE

Plans were laid Tuesday evening at a meeting of the Truckee Post of the American Legion for sponsoring a New Year's dance in Truckee. The vets have made arrangements for the Masonic Hall for the night and a good orchestra will be engaged to provide the music. Special attractions will also be arranged, according to Committee Chairman Charles Pierce. Other members of the committee are Frank Crail, H. O. Anderson, Jack Wolert and Harvey Frazier.

### PARTY AT TAHOE

Forty friends attended a Chinese dinner given by Celeste Planett of Kings Beach Saturday evening, November 2nd.

Dancing was the diversion of the affair. The lodge was decorated attractively in the Hallowe'en motif.

## DR. BARKER TO BE HEARD HERE IN 3 TALKS NEXT WEEK

Dr. Charles E. Barker will be in Truckee November 13 for three addresses before local groups. In the morning he will talk before the high school students at a general assembly, at noon he will address the guests and members of the local Rotary club under whose auspices he comes here, and in the evening he will address a public meeting of parents and young people. This address will be given in the Grammar School auditorium and no charge will be made.

Dr. Barker is a noted lecturer and it is estimated that during his lecture career he has addressed more than 4,155,000 adults, 3,584,000 high school students and 500,000 college students in the United States and Canada.

According to reports from those who have heard him, much of his success as a lecturer is due to his homely philosophy and humor, his understanding of young people and the direct appeal which he makes to their mentality. He talks a good deal with the idealism of youth, their problems and future possibilities.

Dr. Barker is being brought to Truckee by the local Rotary club as a contribution on the part of the club to community development and community welfare.

## GALT BANKER HURT IN CRASH ON ROAD AT RAINBOW TAVERN

W. C. Anderson, 60, Galt banker and owner of a Nevada ranch, suffered head and back injuries which necessitated his removal to the Sutter Hospital in Sacramento when his car got out of control and plunged into the Yuba river near Rainbow Tavern Sunday afternoon. Anderson was returning home from Nevada when the accident occurred. He was alone in the car.

Traffic Officers Ellis McCann and George Spaulding made the investigation.

## HERBERT BRUCK IN TOWN TO PLAN FOR WINTER AT DONNER

Herbert Bruck, who with Peter Wenzel operated the Donner Winter Resort at Donner Lake last winter, was in Truckee this week making arrangements to reopen the popular resort for the coming season. Wenzel, who has gone into aviation at the Boeing School in Oakland, may be here only on week-ends during the season, Bruck said.

Improved facilities for the convenience and pleasure of winter sports enthusiasts are being planned by the resort manager.

### RAILROAD MILEAGE

There is a mile of railroad in the United States for every 550 persons; in the remainder of the world there is a mile of railroad for every 3,277 persons.

## RESULT OF SUPERVISOR RACE IN DOUBT, VOTE IS CLOSE; F.D.R. LEADER

Truckee Turns Out With Large Vote to Give President Big Majority of Local Ballots; Incumbent Officials are Retained

### TONINI, ROBERTSON AWAIT ABSENTEE COUNT

With the results of the supervisor race still in doubt, with a margin of only four votes between the two candidates, Alex Robertson and Ben Tonini, and between 50 and 100 absentee ballots still to be counted, Truckee outdid the balance of the nation by giving President Roosevelt a two-to-one majority over Wendell L. Willkie, Republican candidate.

In the supervisorial contest the incumbent, Robertson, was leading Tonini by a margin of four votes, according to unofficial returns from the four precincts in the Fifth Supervisorial District of Nevada County.

The count to date with the absentee ballots not to be counted for several days stood as follows:

Truckee No. 1 Precinct	
Robertson	120
Tonini	123
Truckee No. 2 Precinct	
Robertson	90
Tonini	100
Soda Springs Precinct	
Robertson	23
Tonini	19
You Bet Precinct	
Robertson	34
Tonini	21
Totals	
Robertson	267
Tonini	263

The President gained 300 votes in the two Truckee precincts and Willkie was given 136. This was divided by Truckee No. 2: Roosevelt, 123; Willkie, 66. Truckee No. 1, Roosevelt, 177; Willkie, 70.

Hiram Johnson as United States Senator, Jerrold Seawell for State Senator, Allen G. Thurman for state assembly and Harry L. Englebright for the congressional seat were all given nice complimentary votes.

Johnson was given 269 votes while the Prohibition candidate, Fred Dyster, received 81 votes and the Communist, Anita Whitney, polled six votes in each precinct for a total of 12.

Englebright had a total of 310 Truckee votes and Seawell polled 287 to his write-in opponent's (L. S. Schroeder) 40. Thurman, unopposed, had 278 votes.

On the propositions Truckee gave those most vital to this district a good vote: On No. 5, daylight savings, the noes won by a vote of 259 to 79. On No. 8, fish and game commission revision, noes 139, yes, 162. On No. 13, state park leases to oil drillers, noes 231, yes 41.

Despite the inclement weather, nearly 450 Truckee voters went to the polls to cast their ballots, a heavy turnout but typical of the balance of the state.

## LEROY WILSONS ARE MANAGERS OF STORE IN EASTERN COUNTY

The Hills Flat Variety Store, successful establishment opening its doors a short time ago, has been purchased and is being operated by Mr. and Mrs. Leroy F. Wilson, formerly of Truckee.

Both are well experienced in customer service, merchandising and good stock selection. Mr. and Mrs. Wilson recently moved there with their family.

Wilson was employed at the Truckee Mercantile Company here and previously lived in Hobart Mills.

## NATIONAL BUREAU WARNS SKIERS TO STAY IN OWN CLASS

Ten million Americans will participate in winter sports during the next few months, estimates the National Conservation Bureau. Many will avoid serious injury or possibly even death, without any detraction from their enjoyment if they will remember not to attempt feats beyond their skill, and to guard against overexertion and overexposure while outdoors.

Keith Weeden, president of the patrol, was master of ceremonies.

Time is Growing Short—Get Christmas Cards Now.

# Our Nation's Safety

S. O. S.

That is not a distress signal. It stands for the services of supply, the services that help the fighting arms of the Army get on with their fighting. These services include such important functions as feeding, clothing, housing, paying, hospitalizing, arming, and even praying for the men who man the guns.

A soldier is just like anyone else. He needs food, clothing, and shelter. The Quartermaster Corps furnishes him with those essential needs. It carries a stock of light-weight uniforms for the Tropics and a supply of fur hats for Alaska. It can make clothing at its Philadelphia depot for all occasions. It provides fish on Friday and turkey on Thanksgiving. It has tents for marching troops and brick barracks for those who are stationary. It buys needlepoints and troop ships. And it has to figure far enough ahead so that when a soldier gets where he is going he will find a Quartermaster already has fixed it so that supper is on the stove.

## Housekeeping for 2,000,000

There are two main ways in which the Quartermaster buys supplies for the Army. It purchases food and articles of standard manufacture direct from commercial dealers and from manufacturers. It puts its market basket over its arm every day and buys a trainload of beef here, a shipload of potatoes there. About sixty per cent of all the food bought for the Army is purchased in large lots by Quartermaster Depots and is furnished to the posts. The other forty per cent of the food, fresh eggs, milk, fruit and vegetables, is bought on contracts made locally by the Quartermaster purchasing officers on the Army Post who are the local housekeepers, looking over the day's bargains and figuring up what to serve. Fresh bread is made every day on some posts and the Army cooks usually bake all their pies and cakes in their unit kitchens. The Quartermaster Corps also operates schools for bakers and cooks to keep the menus up to snuff.

The Quartermaster Corps also develops and obtains most of the motor vehicles used by the Army, except tanks and gun trucks. In peace and war it repairs most of the motor vehicles used by the Army and it one of the arms or services has no truck of its own, the Quartermaster Corps obligingly acts as chauffeur. The Quartermasters also have charge of transporting the Army by land and water. It operates all the Army transport ships which carry troops and supplies to our overseas stations.

## Keeping Fit

The Medical Service maintains the health of the Army, treats its sick, heals its wounded. As the Army ex-

pands Medical Units will be formed from civilian hospital groups. They will have to be supplied with all necessary hospital equipment, through the Quartermaster Corps, which will also have to provide proper hospital facilities, along with laboratories, ambulances, blood for transfusions, to be stored in blood banks, and even vaccines to vaccinate and inoculate the enrollees against everything that a soldier might catch and that is plenty.

## Guns for the Fighting Forces

By this time it will be no shock to learn that an army uses a large amount of weapons, and even greater amounts of ammunition for all the tools of war. The lists of weapon, ammunition, and other materials handled by the Ordnance Department, which is in charge of this work, totals more than 2,500 separate items; these items have altogether more than 250,000 separate parts, and when John Smith, private of the Infantry, is engaged in combat and needs a new firing pin for his rifle, he is not going to be very happy if he is supplied with a gun carriage for a 16-inch naval rifle. It is up to the Ordnance Department to see that all kinds of supplies are where they are needed when they are needed.

It is the business of the Ordnance Department to design, obtain, and distribute, to the arms and services that use them, the weapons with which the war is fought. The work of improving old weapons and developing new ones, such as the M1 Semi-Automatic Rifle, goes on constantly in times of peace and war.

To determine the durability and accuracy of weapons, ammunitions, and other Ordnance materials, tests are carried on by the Ordnance Department at the proving grounds at Aberdeen, Md. The proving grounds not only show the advantages and defects of improvements, but also tests to determine whether manufactured guns and materials are up to the standard set in the contracts. Out of the Ordnance Department has also come the 37 mm. anti-aircraft and anti-tank guns, both of which are of much importance in modernizing our forces. The Ordnance Department also manufactures tanks, bombs, hand grenades, armored cars, scout cars, combat cars, instruments for controlling gun fire, and fireworks. This last is for signalling purposes. However, the Ordnance Department can only manufacture a small amount of weapons necessary to equip an army of 2,000,000 men, therefore it must go out to private manufacturers, and, with the aid of the National Defense Advisory Commission, these contracts are already beginning to be filled.

## Chemical Warfare

The Chemical Warfare service provides chemicals, gases, and smoke, which are the most powerful means of modern warfare. In the World War chemicals were responsible for one casualty in every four among the American troops. Our Army of today must be protected against the chemicals the enemy may use. The principal weapons of the chemical troops are the chemical mortar, the Livens projector and the portable chemical cylinder.

The mortar fires a 4-inch caliber shell (weighing 25 pounds) about 250 yards. About one-third of the total weight of the shell is gas. The Livens projector fires a 60-pound shell (about one-half this weight is chemicals) to a range of about 1450 yards. A portable chemical cylinder looks just like the steel compressed air bottles familiar in welding operations. Chemicals used by the service can be procured through the normal channels of private industry and the Commission expects there will be little difficulty in getting adequate supplies. The chemical service also is in charge of developing suitable masks and overalls. This work is in progress.

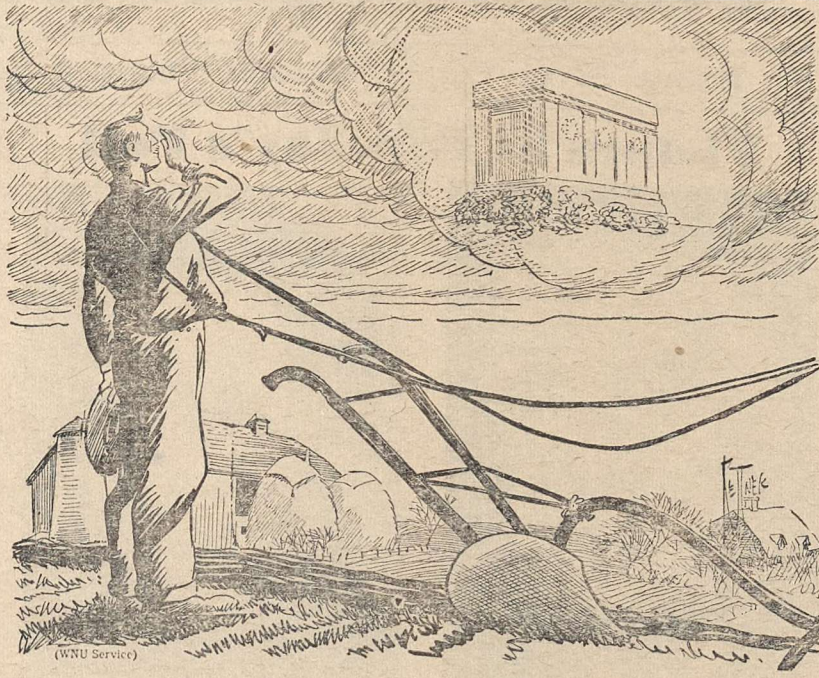

The other services the Army includes the Adjutant General's Office—that is where the orders come from, the records come to, and the records go. The Inspector General's Office keeps a watchful eye on all that goes on in the Army. The Judge Advocate's Office advises on legal questions, civil as well as military. The Corps of Chaplains is specially charged with the religious and moral welfare of all army and services.

### AMERICANS ARE LUCKY—

Suppose the mythical man from Mars came up to you some day and asked you if you were an American. You'd say "Yes," of course. Then suppose he asked you another question:

"What is an American?"

Perhaps your answer would be something like this—or maybe you can improve on it:

"I'm an American," you'd say. "When I hear an airplane, I don't look around for the nearest bombproof shelter. I know that it's carrying people and goods for the purposes of peacetime progress."

"I'm an American. I know that my newspaper and my radio will give me a fair picture of what's going on in the world, to the best of their ability."

"I send my children to school where teachers aren't mere vassals of the State—where the facts that are taught my children help to make them better, more intelligent citizens."

"I'm an American. I can talk freely with my friends, expressing my own opinions on both political and non-political subjects, without the fear that there are spies who listen to my every word and then report it to some high and secret tribunal."

You'd probably say these things and many more beside. And saying them would, in these troubled times, make you realize something else, so that you'd come to say just one thing more:

"I'm a lucky individual. I'm an American!"

—The Silver Lining

### DON'T ROCK THE BOAT—

The results of the presidential election have sent many hopes crashing, while the hearts of other millions are resounding to the cheers which acclaimed the victory of the man of their choice.

Presidential politicking and palaver can now be laid aside for four years, in fact must be laid aside in so critical a period as this. During the coming months we can, if we like, indulge to our hearts' content in recriminations, in bitter attacks on this or that aspect of the campaign, or a campaign speech, which moved us to anger and resentment. We can vent our spleen freely if we choose. But we can ill afford it! Rock the boat in fair weather if you like. But today there are storm clouds on the horizon, the air is filled from abroad with unwelcome threats, jeers and asked for advice directed at us by the masters of power-hungry lands. Shall we make ourselves secure? Shall we make ourselves strong? Shall we arm speedily and efficiently as our brain, brawn and will permit? If so, then we must unite all efforts to that end, forgetting past grudges, old resentments, dispensing with the sourpuss attitude that refuses to pitch in and help without exacting a price for its cooperation.

In unity is our strength, our surest hope of peace. Without unity, we are likely to fail. With it, victory is assured.

### GEMS OF THOUGHT ON STRIVING—

Life affords no higher pleasure than that of surmounting difficulties.—Anon.

He that wrestles with us strengthens our nerves, and sharpens our skill. Our antagonist is our helper.—Burke.

It is the temper of the highest hearts to strive most upwards when the are most burdened.—Sir Phil Sydney.

In the battle of life, good is made more industrious and persistent because of the supposed activity of evil.—Mary Baker Eddy.

Every man that striveth for the mastery is temperate in all things. Now they do it to obtain a corruptible crown; but we an incorruptible.—I Corinthians 9:25.

To wrestle with the angel—this prevails, Though the purpose of the wrestling fails.—Anon.

Ambition is the spur that makes man struggle with destiny. It is heaven's own incentive to make purpose great and achievement greater.—T. D. English.

ADVERTISE!

by ROBERT PATTERSON  
(California Progress Review Writer)

## AXIS MERRY-GO-ROUND

A new theater of war swings into the Mediterranean as Greeks and Italians wage battle in the borderline mountain passes, while the British fleet keeps watchful eye on Saloniki, which World War I first cast into the headlines. From Berlin and Rome comes the endless series of verbal balloons of hints and rumors, many of them blown up just to be deflated again in the hope of keeping the world pop-eyed over the ceaseless activity of the dizzily whirling Axis.

The best cure for vertigo induced by this merry-go-round is to take with a large dose of salts the rumors and boasts daily ground out from Axis mills like so many link sausages. Rome and Berlin have created for the world the picture of themselves as two giants, serenely confident, infinite in strength, inexhaustible in their wiles and deceptions. It is a matter of necessity for them to keep their own and other people distracted by this synthetic picture. Otherwise all would notice a curious defect of the giant's and exclaim: "Say, what big clay feet you have!" And that would be the end of the giant. But healthy skepticism and hearty laughter are at the short end of their rope in Europe today. Let's not let them run short over here!

It is estimated that 85 to 90 per cent of regular railway employees are represented by labor unions.

win a foothold, but over the horizon comes the promise of this even more startling advance; freighters booming out of one assembly plant at the rate of more than eight a month!

## CLUES FROM AN ATOM-SMASHER

The world of tomorrow in which radio active chemicals may be produced to control diseases has come a step nearer. The last 1200 tons of concrete have been poured into the foundation molds for the new 4000-ton atom-smashing cyclotron at the University of California in Berkeley. Even radio-active substances produced by the present atom smasher, only one-sixteenth as large as the new machine will be, have unveiled to scientists hitherto unknown functions of the human body, new clues to its grower and to why and how it becomes sick. In these increasing stores of knowledge on why human organisms act and feel as they do lies man's best hope that tomorrow's world will be a better, saner, less violent world.

## FIRE FIGHTERS

California's recreation-seekers didn't trounce the Fire Demon this year, but they did administer a welcome setback—a 25 per cent decrease in forest fires says the latest report of the State Forestry Division, despite increased travel and a dry summer. Let us at least repeat the score in 1941.

### NEWS NOTES FROM TAHOE SCHOOLS

Tahoe students read 223 books during the past two months from the Pomin Memorial Library and the Tahoe Lake Branch of Placer County Free Library. Tahoe students wrote to Mrs. William Pomin of San Francisco expressing their gratitude for the memorial library and received an answer expressing deep satisfaction that the books were so much used.

Tahoe High School students attended the Indian Pageant at Nevada's admission day celebration last Thursday, making the trip by school bus with Mrs. Stella Watson, Mrs. Bliss Hinkle and E. F. Corrigan accompanying.

Motion pictures of skiing and winter sports were shown at Tahoe school auditorium Wednesday through the courtesy of Standard Oil Com-

### C. C. C. MAKE MAJOR IMPROVEMENTS AT TAHOE PARK CAMP

TAHOE CITY—The ten members of the C. C. C. who were employed at the United States Forest Service public camp ground at Tahoe Park left last Wednesday for the camp at Grass Valley. A fine new drainage system with additional culverts at the camp was installed by the crew while at Tahoe in addition to other projects.

pany, also included were reels showing the life cycle of the house fly.

The new edition of the Tahoe Lake School students newspaper, Tahoe Chatter, was published November 7 by Editor Bill Callendar and staff.

Part of the proceeds of the Hawaiian play given by the students recently will be used to fill Christmas boxes for the Junior Red Cross and also for the Food and Shelter Fund.

## Lake Tahoe News

### TAHOE SCHOOLS MAY PARTICIPATE IN BIG DEFENSE DAY RALLY

TAHOE CITY—Tahoe Lake School District has been invited by E. H. Gregory, superintendent of schools of Placer county, to participate in the Defense Rally Day celebration to be held at Auburn on Monday, November 11.

A parade will be held at 9:30 a.m., starting on the grounds of the Auburn Union Grammar School for the elementary unit and on College Lane for the high school and junior college. Decorated cars bearing banners representing the school district or small marching units or floats are desired from each school district.

Patriotic services in the fair stadium will include maneuvers by the Second Battalion of the 184th U. S. Infantry, who will also march in the parade. The army will also put on an air show and the 11th Cavalry may participate. There will be a pageant exemplifying the evolution of the American flag and the crowning of Columbia, goddess of Liberty. Music by the a cappella choir, community singing and a speaker of National Defense will conclude the morning's program.

The annual Roseville-Placer Union football game will be played in the afternoon.

Tahoe school officials plan to participate—weather permitting—and it is hoped a good representation of Tahoe people will attend.

### WAR MAY CREATE NEW PEACE TIME INDUSTRY IN STATE

RED BLUFF—(RNS)—America may soon be smoking pipes made from California-grown manzanita!

That became a possibility here today following the selection of species from the Lassen National Forest for tests by a New York pipe manufacturing concern.

Europe's war has made it impossible to secure sufficient quantities of Italian, Algerian and Balkan briar wood and manzanita may be used as a substitute.

Rocco Curti and Jerome Gevirman,

### ANDERSON NAMES COMMITTEES AT SKI CLUB MEET FRIDAY

TAHOE CITY—The first regular fall business meeting of the Lake Tahoe Ski Club was held at the Tahoe Community Center on Friday night with about 25 members and guests in attendance. Discussion of work to be completed on the Ski Hill planning the program for the year and appointment of committees were included in the order of business of the evening. On the hostess committee the following ladies were named by President A. M. Anderson: Mrs. William LaMarr, Mrs. Sam Goss, Mrs. Floyd Carnell and Miss Florence Vernon.

Members over on the ski hill on Sunday, assisting in the planning improvements to the ski jump and grounds, were Bill LaMarr, Harry Johanson, A. M. Anderson and Carl Becholdt, Jr.

Possibility of some ski movies to be exhibited at Tahoe by Dr. Frank Howard of San Rafael was reported this week by Carl Becholdt, Jr.

The first skiing at Tahoe City was indulged in by young members last Sunday morning who found about two inches of new snow on the golf links before midday sun melted it.

### H & W CLUB TO BE USED FOR MEETING ON NOVEMBER 11th

by Mrs. LEE GARNER

Mr. and Mrs. Roy Stark were hosts at the H & W Philanthropic Club of Weeks Day Monday night. Both the men and their wives have worked hard to prepare the new club house where the first meeting will be held on Monday, November 11 with Mrs. Lee Garner as hostess. The first social affair to be held in the new edifice will be the Hard Times Dance on Saturday, November 23. A large attendance is anticipated. Monday's meeting closed with refreshments and bingo with Mrs. Phil Geier and Chas. Heller with high scores and Mrs. Harold Stark and Phil Geier with low scores.

Bill Gibson, superintendent of the Sierra Construction Company, has returned to the lake from Elko, Nev., on business.

### SUBSCRIBE TO THE SUN

representatives of the pipe manufacturing concern, said a saw mill would be established here and wood shipped to the factory if tests of the manzanita prove successful.

### 29 Out of 31

Bob Lackey, right end for Arizona State, Border Conference champions, who is shooting for national honors in kicking extra points. During 1939 and half of 1940 season he had already kicked 29 extra points in 31 attempts.

### TAHOE NEWS ITEMS IN BRIEF

Dr. G. H. Hinkle of San Francisco spent the week-end at his Tahoe home.

Tahoe Ski Club plans to rent a bulldozer to do additional work at the ski hill soon, making the landing apron bigger and lengthening the take-off.

Mrs. D. M. Brodehl and daughter, Beccy, are guests at the home of Art Brodehl on Grove street.

Mr. and Mrs. Carl Becholdt, Jr., returned last Wednesday from a short business trip to San Francisco and the bay region. While in Berkeley they were guests at the home of Mr. and Mrs. Robert Pomin.

Mr. and Mrs. Willis Hevel of Lakeview Drive were guests at the home of Mr. and Mrs. C. W. Atherton at Fallon last week for several days.

Mr. and Mrs. Paul Heise with their son, Richard, left for their winter home at Palm Springs Monday.

Mrs. Phyllis Carroll, with her son, Sammy Lee, is a guest at the home of her parents, Mr. and Mrs. Charles Swanson of Sunnyside.

Mr. and Mrs. A. M. Henry were hosts at dinner last week to Mr. and Mrs. C. W. Vernon, Miss Florence Vernon, Mrs. M. Planett and Fred Planett.

Mr. and Mrs. C. A. Swanson entertained at a wild duck dinner on Saturday night for Mr. and Mrs. Robert Wallace and daughters, Georgia and Jessie.

Joe Pomin of Idlewild who has been working in Oakland spent the week-end at his Tahoe home. Joe has enlisted in the army.

Miss Lillian Vernon and Miss Jessica Grossman of Berkeley spent the week-end at the home of the former's parents—Mr. and Mrs. C. W. Vernon.

Miss Elaine Edward won the first prize for the prettiest costume at the Halloween party at Truckee school on Thursday last. Her dress was a pink and blue with red hearts and a golden crown. Robert Stark won a prize at the same party in the pillow fight. Other Tahoe youngsters who attended were Robert Edwards, Billy Geier and Sally Cross.

Mr. and Mrs. Charles Johnson of Walnut Creek were guests at the home of Mr. and Mrs. Norman Mayfield last week.

### BAY CITY DOCTOR, TAHOE HOME OWNER, SUCCUMBS IN S. F.

TAHOE CITY—Tahoe friends will regret to hear of the death of Dr. Philip King Brown who had maintained a summer home on the lakeshore near Tahoe Tavern for many years. Dr. Brown, noted for philanthropic and humanitarian work in the bay region, died at a San Francisco hospital last week.

### FIRST LAKE SKIING THIS SEASON IS HAD FOLLOWING STORM

TAHOE CITY—The level of Lake Tahoe on Monday was 6226.37 feet above mean sea level with four gates open at the Truckee River Dam outlet and 340 cubic second feet of water leaving the lake. Temperatures dropped considerably over the week-end with the storms which left about two inches of snow on the ground Sunday but melted by Monday noon at the lake level. Higher peaks received still deeper coats of powder snow and many skiers went to Mount Rose on Sunday where excellent skiing was found. Highest temperature on Sunday was 34 degrees and lowest was 19. Total precipitation received from storms on the 2nd and 3rd was 1.33 inches.

Mr. and Mrs. Lee Garner, who have been cartakers at Cedar Crest in Homewood for the past five years, will live in their own home at Tahoe City this winter.

Mr. and Mrs. Henry Worden of Wad Creek motored to San Francisco last week with their son, James, who was operated on at the University of California Hospital on Friday and is doing well according to last reports.

## MOBILIZE for more Winter Comfort

Now is the time to make your home more attractive and more comfortable. \* Remodel the living room, add that extra room, re-shingle the roof and never forget the kitchen. \* The wife spends most of her time in the kitchen and from that kitchen comes the things that make a husband possible to live with. \* Why not have it bright and attractive?

All of this can be yours with NO DOWN PAYMENT. \* Pay for it by the month with as long as 2 or 3 years to pay.

Hitler had his Blitzkreig—now the European people are cold and destitute.

Let's have our Blitzkreig for more attractive, convenient and comfortable homes.

We are ready to assist you. \* All work will be done done by our local builders.

### NEARLY HALF A MILLION AUTOMOBILE BUYERS AGREE THAT Timeplan FINANCING HAS SAVED THEM MONEY

Previous to Timeplan, thousands of Californians paid high rates on loans for the purchase of cars.

Then Bank of America—always looking out for "the little fellow"—made low-cost financing available. Today, through Timeplan, you can finance any car sold by any dealer.

More than 482,000 motorists have used Timeplan. Loans have totaled more than 250 million dollars—a record surpassing all other financing agencies. Ask your dealer for this modern financing. Look for the Timeplan emblem on the contract.

For maximum satisfaction in any banking service—see Bank of America.

## WINGS FOR AMERICA

by Don Wiley  
MEMBER, AVIATION WRITERS ASSN

A circular, modernistic lobby, its walls decorated with photomontages illustrating airplane production from demand to finished product, leads into one of the most carefully planned aircraft factories in America.

Here, on the outskirts of the quiet Los Angeles suburb of Downey, is the plant of Vultee Aircraft, Inc., creators of sturdy trainers and swift pursuit ships. Here, in this rapidly expanding factory, it is easy to visualize and understand, all the processes that go into creation of modern military aircraft.

For when Vultee's engineers planned this new factory they made a careful study of the adolescent years of the aircraft industry, discovering, among other things, that about 70 per cent of the time required to build an airplane was spent, not in actual construction of the ship, but in moving materials around the plant.

The story of the piece of string is an example. The Vultee engineers drove a number of nails into a board, each nail representing a point of origin for materials, parts or assembly under the old, jumbled production system. Then they attached one end of a string at the starting point and wound the string around the various

nails. The result, so the story goes, clearly resembled a spider web.

The engineers then set about to straighten out the spider web in a simple demonstration of the fact that a straight line is the shortest distance between two points.

Thus, the Vultee straight line production system was evolved. Result: Vultee claims to produce more pounds of airplane per square foot than any other factory in the world.

### Six Section Planes

Let's visit this production line, currently busy on a huge order of BT-13 basic trainers for the U. S. Army Air Corps, and see just how an airplane is put together.

There are six main sections to these planes—fuselage, empannage, center section, outer wing, canopy and power plant. Each of the sections, except the power plant, is constructed in its own jig. (A jig is a frame in which a section of a plane is constructed.) They meet and are fastened together at various points on the assembly line, the plane moves along the line, on a track.

At the upper end of the line we find the main fuselage sections, skeletons of tubular steel which will house the cockpits and controls of instructor and student. To these are added the monocoque sections (the cone-shaped metal sections between the cockpit and the tail.)

In the next phase of assembly we see the other sections feeding into the assembly line from the sides of the

### LOTTERIES A LA CHILE

IT'S a silly looking piece of paper—and you can't read a word that's printed thereon, but it may bring you a neat little nest egg, or a young fortune. It's the lottery ticket which you'll meet on every hand when you take a cruise down the west coast of South America.

The lottery is a "national institution" in Chile—controlled by law and turning over its "takings" to public institutions. It was the University of Concepcion which is responsible for putting the lottery on this beneficent plane, according to an article by E. Esleco in the "Andean Monthly." In 1921 the University was desperately in need of funds. The members of the committee appointed to find a way out of the dilemma were daring enough to suggest the Loteria de Concepcion. The result was that the Loteria was launched with a judicial organization and a directorate that put it on a solid foundation from the very beginning—men with unimpeachable

reputations for honor, integrity and competence. The undertaking was successful and the lottery became a popular as well as a profitable institution. The proceeds were divided among the University, the State Health Department for Public Beneficence, the Red Cross of Chile, Military Hospital, Naval Hospital, University of Chile Clinic, Catholic University Clinic.

"There are two drawings each month," writes Senor Esleco. "The grand prize each time being 200,000 pesos (about \$8,000), with numerous smaller prizes attractive enough to invite hope. On December 24 each year there is the big drawing with a grand prize of 500,000 pesos (\$20,000). Each whole ticket, which is divided into ten parts, costs 50 pesos plus a government tax of two pesos. Tenth parts may be bought for five pesos and twenty centavos each which brings them within the reach of the poor who are ardent supporters of the 'Loteria.'"

EDNA MAE STARK

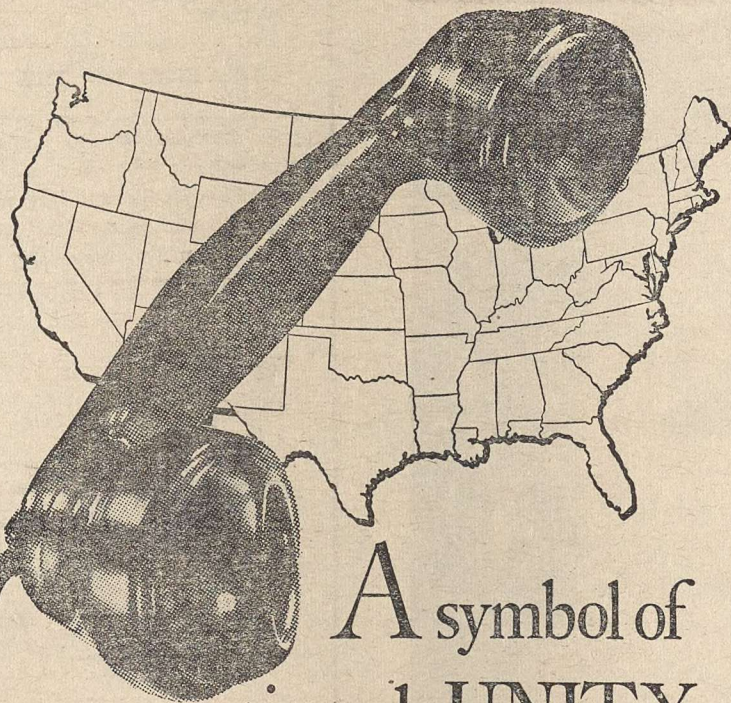

factory, joined to the fuselages first, are the center sections of the wings. Then come the empannages (the tail and rudder assemblies), the outer wing tips and canopies—the glass enclosed frames which cover the cockpit.

The last stage is installation of the power plants. Off on one side of the factory the motors, shipped from the East Coast, have been receiving their

various fittings. The completed engine installations are moved over to the airplane production line on an overhead carrier system and mounted on the planes' noses.

### Wind Tunnel Test

Radio equipment is installed, adjustments are made, other finishing touches completed and five more planes roll out of the final assembly hangar onto the test runway.

## A symbol of national UNITY

"It's good to hear you, Son!"... "Ship the carload at once!"... "I'll be with you next week."... Seventy-six million times a day the people of America talk over Bell System telephone wires.

Courteous, friendly, dependable, America's telephone service is a unifying force—helping to make the nation One.

## SOUTHERN PACIFIC PLACES HUGE ORDER FOR RAILS FOR '41

The Southern Pacific Company has placed orders for about 40,000 gross tons of steel rail, to cost approximately \$1,800,000, for use on its Pacific Lines in 1941, according to announcement by A. D. McDonald, president.

The orders will be divided between Columbia Steel Company, Bethlehem Steel Company and Colorado Fuel & Iron Corporation, McDonald said.

But assembly is only part of the story. In the background is the complex task of taking raw material and cutting, pressing, hammering, bending and drilling it into the myriad of parts that go to make up a military airplane.

Here, as in assembly, Vultee's engineers have been able to accomplish tremendous savings in time and effort.

Off in one corner is a building housing a modern wind tunnel where the performance of a airplane can be determined before it is ever built. Nearby a powerful motor breaks into a snarling roar. Mechanics are testing the power plant of one of the swift and deadly Vanguard 48C pursuits. Characteristic of this pursuit ship, and other Vultee planes, are the removable panels on the fuselage and the quickly removable motor cowling, permitting access to the engine, internal structures and controls for overhaul within two minutes.

You leave the Vultee plant with the conviction that the California aircraft industry is quite capable of devising and adapting highly modern methods for the task of arming America in the air.

## FRISCO FISHERMEN TREK 3,000,000 MILES IN QUEST OF SPORT

SAN FRANCISCO (RNS)—Unwilling to find fishing in their own county, San Francisco anglers 30,000 strong trek more than 3,000,000 miles annually to bays, streams, rivers, sloughs and lakes of other California counties.

That was the estimate of fish and game experts here following a survey of license sales survey compiled by the Division of Fish and Game. San Francisco residents alone spent \$63,824 for licenses, most of them at \$2 per person, according to the latest annual figures.

Each angler travels an average of 100 miles a season, fish and game experts estimated. Associated Sportsmen of California says that the average fisherman spends at least \$10 annually, a low average, for a total of more than \$800,000 by San Francisco anglers alone.

Fishing license sales throughout the state for the current year total \$785,000, the Division of Fish and Game reports. This is far in excess of last year's figures when the total was nearer \$500,000.

Striped bass anglers comprise the major portion of San Francisco's fishing army with trout, black bass, salmon and deep sea fishermen accounting for most of the remainder.

## Armistice Day

**W**E Pause Today upon the threshold of this solemn occasion to bow down our heads before the tomb of him who typifies the thousands who have suffered that the world may live again in peace.

It must not be said that we have forgotten the blood they have shed, nor that we are wanting in appreciation of the ideals for which they fought.

It behooves this Nation to love and cherish through the long, dim years of the future the memory of those who suffered their young lives to be extinguished in the cause of world democracy and lasting peace.

We hope that God may give to the nations of the earth the vision to see, and the will to execute for all time—a glorious, lasting PEACE.

## UNCLE NEEDS EGGS FOR HIS MEN, YOU PAY MORE FOR 'EM

SAN FRANCISCO —(RNS)— One reason why you're paying two to three cents a dozen more for your eggs today than you did last year is because Uncle Sam is using more for his soldiers and sailors.

With October and November always a low peak in egg production, this year's low is made all the more acute by the entrance of the U. S. government as a heavy purchaser.

Increased shipments of eggs are being made to Hawaii, Mare Island, Camp Ord and a score more army and naval posts in the state, J. E. Dougherty, of the Poultry Producers of California said.

**SERVICE IS OUR CREED**

## LEST WE REGRET

Next Monday will mark the 22d anniversary of the armistice that brought a momentary end to the eternal conflict for "balance of power" on the European continent. This balance had been broken against the advantage of the Central Powers by the entry of the United States a few months previously and capitulation, complete but temporary, by Germany and her allies was forthcoming.

It would be well for us to take time in meditation next Monday to sum up the good that came to us from our entry into the war on the side of the British Empire and the French Republic-Empire. We fought a war for peace everlasting—the only peace that was found was peace in death. We fought to bring an end to autocracy and to preserve democracy—totalitarianism more thorough and more universal was the result. Even the industrialists who urged the war selfish reasons were the losers because of resultant business depressions, increasing public debt and multiple taxation.

Those who regard our entry into the war as manifest destiny and a heaven-ministered duty will do well to take time out to think—to ponder the parallel between 1914 and 1940. They would do well to note the methods and arguments used to drag us into the first European war and then they should ponder the history of the past 22 years in regards to the results of the "war to end wars" and the "war to make the world safe for democracy."
